

Attach shipping label — last step

After polybag is sealed with item + invoice inside, print label from Shiprocket / Delhivery / admin and stick as shown.

Steps

1. Complete packing: tissue → thank-you card → invoice in polybag → seal.
2. Weigh package on scale; enter weight in courier portal if required.
3. Print AWB / shipping label (thermal or A4 cut to size).
4. Peel backing; place label centered on **front** of polybag.
5. Smooth flat — no bubbles over barcode.
6. Mark order **Shipped** in admin; send tracking link to customer.

Do

- ✓ Label on flat surface
- ✓ Barcode fully visible
- ✓ Sender = Prayagraj address

Don't

- ✗ Fold label over edge
- ✗ Cover barcode with tape
- ✗ Ship without invoice inside

✓ Match weight slab

✗ Mix up two order labels

Pre-handover checklist

- ☐ Order ID on label matches packed item
- ☐ Invoice inside polybag
- ☐ Thank-you card included
- ☐ Polybag fully sealed
- ☐ Label stuck — barcode scans in portal test
- ☐ Pickup manifest / handover to courier logged
